# Patience

Patience must rank as one of the daftest send-ups of all the Savoy operas. The target is the aesthetic craze of the 1870s and '80s when the output of poets, composers, painters and designers was prolific, and some argued, self-indulgent and empty. Patience the dairymaid is having trouble negotiating the vagaries of true love while the ladies of the village are fickle in their affections; engaged to members of the local dragoon guards one minute, then ardently pining for the latest aesthete who drifts by quoting lurid poetry, the next. However mad the plot, the music is not and features some lovely solos, ensembles and rousing marches to accompany the witty dialogue.
